Charlesworth Slides of Odontoglossum Alliance Flowers

The Eric Young Orchid Foundation library retains the slides from the Charlesworth Nursery. Through the generosity of Chris Purver, curator and Michelle Tremayne, archivist/librarian we are printing some of the images of plants listed in the Charlesworth catalogs previously published. Michelle has reviewed the catalogs published to date and found 59 images with the same names as those printed in the catalog. We will be publishing a set of these images each quarter with the first set in this issue of the newsletter.

The Odontoglossum Alliance is indebted to the Eric Young Orchid Foundation for their generosity in providing the images. More importantly for their hard work to find in the very large slide collection this set of pertinent images. The original photographs were in a 2.5-inch x 3.5-inch format. These were subsequently converted to 35 mm slides, from which the current images were scanned.

Again our thanks to Chris and Michelle.

VUYLSTEKEARA.

(tri-generic hybrids combining *Miltonia*, *Cochlioda* and *Odontoglossum*)

A very distinct and beautiful race of hybrids, closely allied to *Odontonia*, and in some varieties even more brilliant in colour through the *Cochlioda* blood. One of this genus was awarded the Special Medal given by the Royal Horticultural Society for the best greenhouse plant exhibited during the year 1929. Their cultural requirements are similar to *Odontonia*.

Nos.		Each.	
		£	s. d.
1750	Aspasia (Oda. Charlesworthii × M. Charlesworthii)		
	Flower medium size and good shape. Sepals and petals rosy-crimson, lower half of lip blush mauve. Good plant with 4 bulbs, 2 of which have leaves, 1 lead	4	4 0
1751	„ polysticta. A.M., R.H.S. A choice variety, medium size. Sepals and petals dark crimson, the shapely labellum crimson at base, front lobe white, densely spotted rosy-purple. Nice plant with 4 bulbs, well leaved, and making a strong growth	15	15 0
1752	Apama (Odontonia Merope × Oda. Ganesa)		
	A medium-sized flower. Sepals, petals and lip maroon, with yellow crest. Small plant with 3 bulbs and making a new growth	3	3 0
1753	Arbela (Odontonia Latona × Oda. Gwentara)		
	A promising hybrid of good shape. Sepals and petals claret-red, lip rosy-magenta. Good plant with 4 bulbs, well leaved, 1 lead	5	5 0
1754	Aurora (M. Bleuana × Oda. Meteor)		
	Flower medium size, ground colour brick-red, broken with chestnut spots. Nice plant with 3 bulbs, well leaved, 1 lead	2	2 0
1755	Averna (V. Rutherford's Sylva × M. William Pitt)		
	Flower medium size. Sepals and petals rosy-purple shading to mauve, lip having central blotch of chestnut-red with mauve margin. Nice plant with 4 bulbs, well leaved, and making a new growth	4	4 0
1756	Brewii (Oda. Brewii × M. vexillaria)		
	A flower of fine substance, deep rosy-purple throughout. Good plant with 5 bulbs, well leaved, 1 lead	5	5 0
1757	Cambria (V. Rudra × O. Clonius)		
	Flower of medium size, sepals and petals mahogany-red, lip rose, spotted with red. Nice plant with 3 bulbs, well leaved, 1 lead	3	3 0
1758	„ Brilliant. A splendid good-shaped flower. Sepals and petals ruby-purple, lip mauve, spotted amethyst, with golden-yellow mask. Nice plant with 3 bulbs, well leaved, and making a new growth	15	15 0
1759	Carminia (V. Aspasia × Oda. Rona)		
	A medium-sized flower. Sepals and petals chestnut-brown, lip rosy-magenta with purple spots. Nice plant with 3 bulbs, well leaved, and making a new growth	5	5 0
1760	Crusader (V. Aspasia × M. Prince Imperial)		
	Sepals, petals and lip rosy-mauve, crest yellow. Good plant with 4 bulbs, well leaved, 1 lead	5	5 0
1761	„ Norman. A handsome flower. Sepals, petals and lip deep rosy-magenta. Strong plant with 4 bulbs, well leaved, and making a new growth	12	12 0

1792	Urania...	(<i>V. Memoria Joseph Charlesworth</i> × <i>Oda. Dolosa</i>) A distinct hybrid. Sepals and petals maroon, lip ruby-red and having a lemon-yellow mask. Nice plant with 3 bulbs, well leaved, and making a strong new growth ...	8	8	0
1793	Uriel ...	(<i>Odontonia Nubia</i> × <i>Oda. Dolosa</i>) A splendid hybrid of Miltonia shape and size. Sepals and petals rich maroon with pale cream veinings. Lip spotted white on a maroon ground and having a yellow crest. Good plant with 4 bulbs, well leaved, 1 lead ...	10	10	0
1794	Zena ...	(<i>M. Hyeana</i> × <i>Oda. Joan</i>) A medium-sized flower. Sepals and petals purple with mauve margin, lip purple shaded with mauve and white margin. Nice plant with 3 bulbs, well leaved, and making a new growth ...	4	4	0

WILSONARA (*tri-generic hybrids combining Oncidium, Cochlioda, and Odontoglossum*). At present this is a small family of hybrids. The possibilities for the hybridist are great, however, and more may be expected from this decorative race. Their cultural requirements are similar to *Odontoglossum* and *Odontioda*.

1795	C.	..	insignis ...	(<i>Oncidioda Charlesworthii</i> × <i>O. illustrissimum</i>) Strong plants with 4 to 6 bulbs, well leaved, 1 lead ...	2	2	0

ODONTOGLOSSUM HYBRID SEEDLINGS, UNFLOWERED.

Our strain of hybrid Odontoglossums is acknowledged the finest in the World. The fact that a large majority of the varieties receiving awards from the Royal Horticultural Society for a number of years past have been raised by us—if not always exhibited by ourselves—is indisputable. All have been raised from our noted Pedigree stock—the choicest in existence.

All are healthy progressive plants, four and five years old, and strong enough to flower from current growth.

							£	s.	d.

Special quotations given per 100 and 1,000 plants.									

ODONTIODA, UNFLOWERED.

We hold by far the largest stock of these charming hybrids. The following offer is for nice healthy progressive plants, four to six years old, and strong enough to flower.

No. 1	Category.	Choice crosses raised from first-class parents	...	...	...	... per dozen	3	3	0
.. 2	..	Choicer crosses	...	...	...	..	5	5	0
.. 3	..	Extra choice crosses	...	...	...	..	10	0	0
.. 4	..	Specially selected crosses	...	...	...	..	15	0	0

MILTONIA HYBRIDS, UNFLOWERED.

During the last decade we have produced and exhibited such "Wonders" in this genus that it is quite unnecessary for us to eulogize here. The following offer is for nice healthy progressive plants, three and four years old, and strong enough to flower this season.

No. 1	Category.	Choice crosses	...	...	...	... per dozen	3	3	0
.. 2	..	Choicer crosses	...	...	...	..	5	5	0
.. 3	..	Extra choice crosses	...	...	...	..	7	0	0
.. 4	..	Specially selected crosses	...	...	...	..	20	0	0

BRASSOCATTLEYA, BRASSOLÆLIOCATTLEYA, CATTLEYA, LÆLIOCATTLEYA HYBRIDS. UNFLOWERED.
